# Wireless Skype™ Phone - W1D

Are you tired of having to constantly sit by your computer while talking on Skype? Introducing a revolutionary way to unwire yourself - Wireless Skype Phone W1D.

W1D phone is ideal for home and office use, it consists of a base station and a handset featuring elegant and lightweight design. The base features a built-in high quality speakerphone, ideal for conference calls. The handset has large graphic LCD with blue color backlight, which allows you to review Skype contacts and call lists right on the handset. You can make and receive calls via the handset without the limitation of a USB cable, just like using a mobile phone.

2.4G wireless phone — Base — USB Cable Connection — Desktop Computer Notebook — Cable or XDSL Connection — Internet

Features
